## Welcome to the meeting of the of the International Round Table

On the occasion of the 55th anniversary  
of the S. I. Yuriy Department of Finance  
of the West Ukrainian National University

Today's global challenges dictate new conditions for interaction in the modern world, which requires modernisation of the system of global cooperation, taking into account the national interests of the state and society, as well as the formation of open, effective and mutually beneficial international relations based on partnership and parity.

Countries around the world are facing a variety of challenges: from climate change and environmental crises to pandemics, economic instability, and military conflicts. Without a united effort to identify, discuss and study these issues, the chances of solving them will be minimal and the consequences will be catastrophic.

That is why the initiative to organize a roundtable discussion on "International Cooperation in the Face of Global Challenges" is of particular relevance. This event opens a platform for discussing the most important issues related to international cooperation and facilitates the exchange of ideas and views of young activists.

Passionate young people and experienced professionals from various fields decided to unite around the idea of creating an International Discussion Platform, which would become a platform for holding relevant discussions, polemics and expressing ideas that could help achieve positive changes in the world.

So, thank you for your initiative, your thoughts and time devoted to this event, as your direct participation demonstrates your active citizenship and purposeful goal to change the world for the better.

The purpose of the  
roundtable:

Formation of an international information space among scientists, educators, professional experts - specialists in various fields of activity - to cover, publish and discuss current issues, as well as to find effective and optimal ways to solve them, taking into account the best world achievements of modern theory and practice.
